SOFTWARE DEVELOPER

Dedicated software engineer with more than 2 years of experience specializing in Backend Development with Spring Boot. Skilled in building robust REST APIs and optimizing backend systems for improved performance and scalability. Strong problem-solving abilities and a commitment to code quality and readability. Collaborative team player with a track record of delivering high-quality solutions.

TECHNICAL SKILLS

Languages	: Java, C++, Python, Kotlin, Javascript
Frameworks	: Spring Boot, Flask, React, Numpy, Pandas, Scikit-Learn, OpenCV, Tkinter
Databases	: MySQL, PostgreSQL
Dev Tools	: Visual Studio Code, IntelliJ IDEA, Git, Github, Vim, Postman, Android Studio

EXPERIENCE

System Engineer

Tata Consultancy Services

July 2022 – Present

Gandhinagar, Gujarat, India

- Designed and implemented **database designs** and **REST APIs** for multiple essential systems using **Spring Boot**, ensuring efficient communication between frontend and backend components, and enhancing overall system functionality
- Resolved critical production issues promptly and optimized backend performance through **code enhancements** and **MySQL query optimizations**, while following best Spring Boot practices to ensure **code readability** optimal maintainability

Backend Developer – Intern

Tata Consultancy Services

Jan 2022 – May 2022

Remote – Gandhinagar, Gujarat, India

- Developed interactive and customizable user interfaces using the **ZK framework** to enable real-time chart and report generation, enhancing user experience and data visualization capabilities
- Utilized troubleshooting skills to **identify and resolve bugs and issues** in the backend systems, ensuring uninterrupted operation and reliability of applications, thus optimizing overall performance

Blockchain Developer – Intern

Inficube Technolabs

May 2021 – June 2021

Remote – Ahmedabad, Gujarat, India

- Developed a Python program to simulate cryptocurrency network operations, focusing on **transaction processing**, **block creation**, and **blockchain validation**
- Implemented cryptographic algorithms and data structures including **linked lists** and **dictionaries** to ensure **secure transaction** handling and maintain blockchain integrity

EDUCATION

Nirma University

Bachelor of Technology in Electronics and Communication Engineering (7.81 CPI)

Ahmedabad, Gujarat, India

July 2018 – July 2022

PROJECTS

A* Pathfinder

Pygame

[Source Code](#)

- A Python3 based app to visualize the A* path finding Algorithm.
- Allows users to pick a start and an end point view the process of finding the shortest path through user-defined obstacles.

Document Scanner

OpenCV, Numpy

[Source Code](#)

- Developed a Python3 based Document Scanner to detect and scan objects in front of the camera.
- Implemented Gaussian Blurring and Canny edge detection algorithms to enhance the quality and accuracy of scanned documents.
